

## Our EQMS Policy Statement

SF Taylor is committed to a policy of ongoing service improvement and will take this into account at all stages of business planning, development and production. We are aware we have a responsibility in the way we carry out our work and are fully committed to reducing or eliminating any negative impacts our actions may have on the environment. By identifying any significant impacts we have on the environment and modifying or controlling how we operate, we will ensure that these impacts are reduced to a minimum.

Our Environmental & Quality Policy is implemented through an Environmental & Quality Management System (EQMS) based on the requirements of the international standards - ISO 14001: 2015 and ISO 9001: 2015.

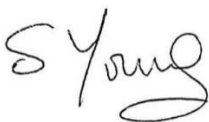

### Senior management is committed to:

- Ensuring that customer and applicable statutory and regulatory requirements are determined, understood and consistently met.
- Continual improvement of the EQMS by ensuring the risks that can affect conformity of products and services and the ability to enhance customer satisfaction are determined and addressed.

### Senior management shall:

- Take accountability for the effectiveness of the EQMS.
- Ensure that the resources needed for the EQMS are available; including training, support and encouragement.
- Communicate the importance of effective environmental and quality management and of conforming to the EQMS requirements to all supplier partners.

This policy will be communicated to all employees and organisations working for or on our behalf. Employees and other organisations are expected to co-operate and assist in the implementation of this policy, whilst ensuring that their own work, so far as is reasonably practicable, is carried out without risk to themselves, others, or the environment. This policy will be reviewed periodically by senior management and revised so that it remains appropriate to the scale and nature of the business.
